SUMMARY

Final-year Information Technology student with hands-on experience in software development and project-based learning. Strong understanding of Data Structures and Algorithms, with practical experience building real-world applications. Familiar with Machine Learning concepts and passionate about solving problems through technology. Quick learner with the ability to adapt to new technologies and work effectively in collaborative environments.

TECHNICAL SKILLS

Languages: C/C++, Python, SQL

Frontend & Database: HTML5, CSS3, MySQL

Machine Learning & Data Analysis: NumPy, Pandas, Matplotlib, Machine Learning, Deep Learning

Tools & Frameworks: Git, GitHub, Git Bash, Bootstrap, Scikit-learn, PyTorch

Core CS: Data Structures, Algorithms, Operating System, Object Oriented Programming

PROJECTS

- **Ganpati Handloom – E-Commerce Platform** | [Live Demo](#) **Feb 2026 - May 2026**
 - A full-stack e-commerce platform with admin dashboard, product management, and dynamic product pages.
 - Implemented filtering, collections, and scalable UI with ongoing cart and order system integration.
- **CreditWise-Loan-Prediction Model** **Jan 2026**
 - Developed a reinforcement learning-based model for loan risk prediction using historical credit data
 - Trained the model to learn optimal decision policies for accurate loan approval prediction
- **SmartCart-Customer-Segmentation** **May 2026**
 - Performed customer segmentation using ML techniques to group customers based on purchasing behaviour.
 - Applied data preprocessing, feature scaling, and clustering algorithms to identify distinct customer.
- **CodePulse – Developer Collaboration Platform** **Oct 2025 - Dec 2025**
 - A full-stack developer collaboration platform with repository management and activity tracking.
 - Built dynamic user profiles with smooth UI transitions, and performance-optimized REST APIs. Focused on clean architecture, responsive design, and an interactive user experience inspired by real-world developer workflows.

EXPERIENCE

- Project Engineer (Academic Role)** **Oct 2025 - Dec 2025**
- Led a team of developers in designing and building a full-stack web application as part of an academic project
 - Coordinated task distribution, tracked progress, and ensured timely delivery of project milestones..

EDUCATION

- B.Tech (IT)** **2023 - 2027**
- GL Bajaj Institute Of Technology And Management
 - CGPA: 8.21
- Class XII (Senior Secondary), CBSE** **2022**
- City Vocational Public School, Meerut
 - Percentage: 89.4%

ADDITIONAL INFORMATION

Certifications

- GenAI Powered Data Analytics Job Simulation - Tata
- Full Stack Web Development(MERN) - Apna College
- CSS (Basic) - HackerRank
- CCNA: Introduction to Networks - Cisco
- Apply AI: Analyze Customer Reviews - Cisco
- TCS iON Career Edge - Young Professional
- Technology Job Simulation - Deloitte
